SUMMARY

Senior Forward Deployed Engineer with 14 years of experience building production systems at the intersection of web engineering and AI. At EQT Group I build agents, RAG pipelines and MCP integrations for the investment teams, after building microfrontend platform infrastructure at Klarna and identity products at Auth0. Former Google Developer Expert, international conference speaker and bootcamp instructor.

EXPERIENCE

EQT Group · Global investment organization, €350B+ in assets — August 2021 – Present

Senior Forward Deployed Engineer

- Take the investment team's hackathon prototypes to production: agentic screening of add-on M&A targets and an earnings-call screener, delivered as reusable agent skills over MCP data connectors.
- Contributed to the internal platform for AI agents (model gateway, agent identity, MCP layer); defined its adoption funnel metrics and built the usage dashboard.
- Built LLM tools for investment screening, with RAG over proprietary deal data (PGVector, LangChain) and LangSmith observability in production.
- Established the foundations of a shared Design System with component scaffolding and automated testing across internal products.

Klarna · Global fintech serving 87M+ consumers — September 2019 – August 2021

Engineer (Foundations team)

- Designed and maintained 20+ shared microfrontend UI packages consumed by 5+ product teams across checkout, payments and consumer products.
- Moved the team from 5–10 scattered micro-deployments to a daily deployment cadence with on-demand hotfixes.

Auth0 · Cloud identity platform, now part of Okta — October 2016 – September 2019

Engineer

- Developed internal products powering platform operations (React, Redux, Hapi.js, MongoDB); introduced Storybook and snapshot testing to prevent regressions.

Huge · Global digital agency for Fortune 500 brands — May 2015 – October 2016

Web Engineer

- Built a cross-browser, cross-device fintech web app with React and Redux, and led frontend on a performance-critical mobile web app.

Komet Sales · SaaS platform for the floral industry — August 2012 – May 2015

Full-stack Developer

- Delivered corporate projects in Java (Spring, Hibernate) and MySQL, and led the definition of the frontend architecture.
- Drove the migration from SVN to Git and the adoption of Scrum.

SELECTED PROJECTS

Haggler Agent · Python, Vertex AI, Astro

Google ADK + Gemini agents tracking subscription prices in 67 countries. Grounded research, deterministic verdicts, hard cost ceilings.

github.com/glrodasz/haggler-agent · haggler.guillermorodas.com

Nido Agent · Python, Firebase, Astro
Family viewing agent on ADK + Gemini, with prompt-injection evals and a shared multi-family app in three languages.
`github.com/glrodasz/nido-agent · nido.guillermorodas.com`

Walleto · Next.js, TypeScript, Firestore, Auth0
Personal-finance planner with multi-currency and net worth.
`github.com/glrodasz/walleto · walleto.guillermorodas.com`

Timepass · Swift, SwiftUI, AppKit, macOS
Native Apple Silicon menu bar world clock with country flags. Pure AppKit + SwiftUI, no Electron.
`github.com/glrodasz/timepass · timepass.guillermorodas.com`

SKILLS

AI & LLM	Google ADK, Gemini on Vertex AI, LangChain, LangSmith, MCP servers and connectors, RAG with PGVector, CopilotKit, agent evals, OpenAI and Anthropic APIs
AI-first engineering	Claude Code, Cursor, reusable agent skills, PR-based review
Backend platforms	Node.js (Express, Fastify, Hapi.js), Python (FastAPI), Go, Rust, GraphQL, REST
Frontend frameworks	React, Next.js, TypeScript, Redux, Zustand, Storybook, Design Tokens, Tailwind CSS
Cloud & DevOps	GCP (Cloud Run, Cloud Workflows, BigQuery), AWS, Cloudflare (Workers, D1, Pages), Firebase, Docker, Kubernetes, Datadog
Data	PostgreSQL, BigQuery, MongoDB, MySQL, ElasticSearch, Kafka, Firestore
Auth & Identity	OAuth, OIDC, Auth0, WebAuthn and Passkeys
Testing	Playwright, Vitest, Jest, Storybook interaction tests

EDUCATION

UX Designer Upskill · Hyper Island — `October 2023 – May 2024`

Systems engineering (undergraduate) · Universidad Nacional de Colombia — `January 2007 – January 2010`

RECOGNITION & SPEAKING

Google Developer Expert	Web Technologies `2019 – 2025`
Auth0 Ambassador	Identity & Security `2022 – 2024`
The Language of AI: Probability	DevFest Ourense `November 2025` · DevFest Mediterranean `December 2025`
WebAuthn & Passkeys: The Future of Authentication	DevFest Singapore, EpicHey! `November 2023` · DevFest Zagreb `October 2023`
Bootcamp Instructor	Código Facilito `October 2022, February 2023, March 2024` · Undefined Academy `March 2023 – October 2023` · Platzi Master `November 2020 – September 2022` · World Tech Makers `June 2017 – August 2017`
